Sommario/riassunto	Looking for the Proletariat is a contribution to understanding the implosion of the Marxist Imaginary. The implosion is staged in terms of the first English-language history of the French revolutionary group Socialisme ou Barbarie from 1949 to 1957. It explains why Socialisme ou Barbarie was the only Marxist organization interested by worker experience and how the group's anti-Leninist position on organization led it to privilege first-person worker narratives in order to understand worker experience and its revolutionary possibilities. Using the only first-person accounts of working-class experience in French industry of the 1950's, the book explores the disintegration of collective investment in the Marxist Imaginary that unfolded at Renault's

Billancourt factory in the aftermath of the Hungarian Revolution and the contexts that shaped it.
