Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	A multidisciplinary approach to the care of women with gynaecological cancer - with treatment delivered in linked local or specialist centres - has been established in the UK. The second edition of this book therefore includes chapters which focus on the multidisciplinary approach. Chapters on pathology, radiology, chemotherapy and radiotherapy will increase understanding of these disciplines that are central to the care of women with gynaecological cancers. Chapters on laparoscopic surgery, basic surgical principles, palliative care, emergencies and treatment-related complications provide additional information. All content has been updated to reflect current practice and present the latest evidence on investigation, staging and management. The book is primarily designed to provide a comprehensive summary for candidates preparing for the Part 2

MRCOG examination, and as such covers the RCOG curriculum for gynaecological oncology. It is also a valuable guide for all healthcare professionals working in the field, including trainees, consultants and midwives.
