

1. Record Nr.	UNISA990001044780203316
Titolo	Notiziario: Comitato Nazionale per L'Energia Nucleare
Pubbl/distr/stampa	Roma : C.N.E.N., 1960-1981
Descrizione fisica	v ; 30 cm
Disciplina	539.1
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Periodico
2. Record Nr.	UNINA9910788009003321
Titolo	Genomics, physiology and behaviour of social insects // edited by Amro Zayed, Clement F. Kent ; contributors, Patrick Abbot [and twenty-three others]
Pubbl/distr/stampa	Amsterdam, [Netherlands] : , : Academic Press, , 2015 ©2015
ISBN	0-12-802348-1
Edizione	[First edition.]
Descrizione fisica	1 online resource (380 p.)
Collana	Advances in Insect Physiology, , 0065-2806 ; ; Volume 48
Disciplina	595.71782
Soggetti	Insect societies Insects - Genetics Insects - Physiology Insects - Behavior
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Front Cover; Genomics, Physiology and Behaviour of Social Insects; Copyright; Contents; Contributors; Foreword; Introduction to Advances in Insect Physiology: Genomics, Physiology and Behaviour of Social

Insects; References; Chapter One: Old Threads Make New Tapestry-
Rewiring of Signalling Pathways Underlies Caste Phenotypic Plasticity in
the Ho ...; 1. Introduction; 2. Differential Feeding of Honey Bee Larvae;
3. The Secrets of Royal Jelly; 4. The Role of JH in Honey Bee Caste
Development; 5. IIS, TOR and Egfr Pathway Activities in Honey Bee
Caste Development
6. Endogenous Hypoxia in Worker Larvae-Convergence of Nutrient
Signalling and Oxidative Metabolism7. Epigenetics and Caste
Development; 8. Are There Commonalities Between Context-Dependent
Signalling Pathways in Larval Caste Development and Adult Caste Funct
...; 9. Conclusions; Acknowledgements; References; Chapter Two: The
Physiological and Genomic Bases of Bumble Bee Social Behaviour; 1.
Introduction; 1.1. The *B. terrestris* colony life history; 1.2. The social
history of the *B. terrestris* colony; 1.3. Alternative life history strategies
1.4. Ultimate mechanisms shaping bumble bee social behaviour2. Kin
Conflict over Sex Ratios in Bumble Bees; 3. Behavioural, Physiological,
and Genetic Traits Associated with the Solitary Phase; 3.1. Pre-mating
and mating behaviour; 3.2. Diapause in newly mated queens; 3.3.
Genomic mechanisms underlying the queen solitary phase; 4.
Behavioural, Physiological, and Genetic Traits Associated With the
Eusocial Phase; 4.1. Who wins the conflict over male production?; 4.2.
Underlying hormonal mechanisms and queen effect on worker
reproduction
4.3. The chemistry underlying queen-worker conflict over
reproduction-Is there a queen pheromone?4.4. Genomic factors
underlying queen-worker conflict; 5. Worker-Worker Conflict over
Reproduction; 5.1. Rates of worker reproduction; 5.2. Worker
reproductive hierarchy; 5.3. Aggression and hierarchy formation; 5.4.
Chemical communication versus dominance behaviour; 5.5. Hormonal
regulation of reproduction and dominance; 5.6. Genomic mechanisms
underlying worker-worker conflict; 5.7. Factors affecting dominance
and reproduction in workers
5.8. Drifting bees: Fortuitous error or intra-specific parasitism?5.9.
Extrapolating from QL groups to whole QR colonies; 6. Larval
Development and Mechanisms Underlying Caste Determination; 6.1.
Larval development; 6.2. The critical period for caste determination;
6.3. Hormonal and genomic regulation of caste determination; 6.4.
Physiological and social factors affecting caste determination; 6.5.
Nutrition as a factor affecting caste determination; 6.6. The effect of
queen-worker conflict on caste determination; 6.7. Is there a queen
pheromone that regulates caste determination?
7. Conclusions and Future Directions
