Sommario/riassunto	World Ethics: The New Agenda identifies different ways of thinking about ethics, and of thinking ethically about international and global relations. It also considers several theories of world ethics in the context of issues such as war and peace, world poverty, the environment and the United Nations. Key Features Rejects the idea of international scepticism and the 'morality of states' Demonstrates the distinction between a global ethic as a theory and as social reality Defends the claim that we are world citizens with global duties The second edition has been substantially revised to take account of recent global developments. The discussion is grounded in an awareness of the post-9/11 world in which we live and offers a more detailed exploration of the idea of global citizenship and a global or cosmopolitan ethic. There are new sections on terrorism and security

and on global justice, and additional material on issues such as climate change, internationalist ethics, the ethics of war, sustainability, development, globalisation, global civil society and global governance. Each chapter now has a summary box at the beginning and a set of questions for discussion at the end.
