Sommario/riassunto

Child trauma and violence is not an issue that is constrained to one nationality or one ethnicity. A staggering number of children around the world are subjected to violence and abuse, both domestic and political. The current volume examines the issue of developmental trauma from a variety of viewpoints, including sociological, epidemiological, genetic, and psychiatric. The chapters contained within are broken into the following sections: Child neglect and violence from an international perspective The effects of war and armed conflict on children's health and development The impact of child
