Description and Sources of Raw Data; 15. Derivation of Historical Smoking Prevalence; 16. Timeline of Tobacco-Related Events by Country; Author Index; Subject Index
Sommario/riassunto	Despite efforts to curb tobacco use, global tobacco addiction remains as strong as ever. Smoking rates are declining very slowly in advanced countries, and they are increasing in the developing world. Yet,

researchers still do not fully understand what drives smoking decisions. Life-Course Smoking Behavior presents smoking trajectories of different generations of women and men from ten of the world's most visible countries, with nation-specific representative samples spanning more than eighty years of recent history. To inspire hypotheses on the determinants of smoking behavior, the authors pl
