Nota di contenuto	<p>Contents; I. Introduction; A. Literature Review; II. The Theoretical model; A. The model structure; B. Theoretical predictions; Figures; 1. Prices and Traders' Expectations after a History of Buys; III. The Experiment and the Experimental Design; A. The experiment; B. Experimental design: the two treatments; 2. Prices and Traders' Expectations after a History of Sells; 3. Prices and Traders' Expectations after a Sell Followed by a History of Buys; IV. Results: Rationality, Herding and Contrarian Behavior; A. Treatment I; Tables; 1. Average behavior in Treatment I 2. Cascade trading behavior in Treatment I B. Treatment II; 3. No trade in Treatment I; 4. Average behavior in Treatment II; V. Comparison with Previous Experimental Results; 5. Cascade trading behavior in Treatment II; 6. No trade in Treatment II; VI. Individual Behavior; 7. Percentage of decisions in accordance with the theoretical prediction at individual level.; VII. Conclusions; 8. Regressions of the level of rationality in the experiment on individual characteristics. P-values in parenthesis</p> <p>9. Regression of subjects' payoff at the end of the experiment on individual characteristics. P-values in parenthesis10. Regressions of participants' proportion of herding, contrarianism and no trading on the trader's dummy. Herd 1 and Contrarian 1 refer to Treatment I. Herd 2 and Contrarian 2 refer to Treatment II. P-values in parenthesis; References</p>
Sommario/riassunto	<p>We study herd behavior in a laboratory financial market with financial market professionals. We compare two treatments, one in which the price adjusts to the order flow so that herding should never occur, and one in which event uncertainty makes herding possible. In the first treatment, subjects herd seldom, in accordance with both the theory and previous experimental evidence on student subjects. A proportion of subjects, however, engage in contrarianism, something not accounted for by the theory. In the second treatment, the proportion of herding decisions increases, but not as much as theory suggests; moreover, contrarianism disappears altogether.</p>

Nota di contenuto	Introduction -- Addressing global health education needs of students from across the globe -- Connecting Problems, Connecting Scholars: Creating a Sustainable Interdisciplinary Discourse Around Migration, Urbanization, and Health -- Secret History: Transcultural adaptation of a training intervention promoting empathic engagement and self-case for obstetric staff -- Provider workload and multiple morbidities in the Caribbean and South Africa -- Project Redemption: Conducting Research with Informal Workers in NYC, USA and Pune, India -- Applying a framework for urbanization to maternal and child health -- Long-term prospects and global health collaboration. .
Sommario/riassunto	This stimulating open access volume details the innovative work of the

Pan Institution Network for Global Health in creating collaborative research-based answers to large-scale health issues. Equitable partnerships among member universities representing North America, Africa, Asia, and Europe reverse standard cross-national dynamics to develop locally relevant responses to health challenges as well as their underlying disparities. Case studies focusing on multiple morbidities and effects of urbanization on health illustrate open dialogue in addressing HIV, maternal/child health, diabetes, and other major concerns. These instructive examples model collaborations between global North and South as meaningful steps toward the emerging global future of public health. Included in the coverage: Building sustainable networks: introducing the Pan Institution Network for Global Health Fostering dialogues in global health education: a graduate and undergraduate approach Provider workload and multiple morbidities in the Caribbean and South Africa Project Redemption: conducting research with informal workers in New York City Partnership and collaboration in global health: valuing reciprocity Global Health Collaboration will interest faculty working within the field of global health; scholars within public health, health policy, and cognate disciplines; as well as administrators looking to develop international university partnerships around global health and graduate students in the areas of global health, health administration, and public health and related social sciences (e.g., sociology, anthropology, demography).
