Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents; I. Introduction; II. Data and Cyclical Properties; III. Oil Prices, Output Cycles, and Fiscal Policy; IV. Panel VAR Framework; V. Sensitivity Checks and Extensions; VI. Conclusions; References; Appendixes; A. Data Sources and Descriptions; B. Unit Root Tests
Sommario/riassunto	This paper empirically assesses the impact of oil price shocks on the underlying non-oil economic cycle in oil-exporting countries. Panel VAR analysis and the associated impulse responses indicate that in countries where the oil sector is large in relation to the economy, oil price changes affect the economic cycle only through their impact on fiscal policy. Once fiscal policy changes are removed, oil price shocks do not have a significant independent effect on the economic cycle.
