Sommario/riassunto	Estelle Tarica's work shows how modern Mexican and Andean discourses about the relationship between Indians and non-Indians create a unique literary aesthetic that is instrumental in defining the experience of mestizo nationalism. Engaging with narratives by Jesus Lara, Jose Maria Arguedas, and Rosario Castellanos, among others, Tarica explores the rhetorical and ideological aspects of interethnic affinity and connection.

<b>Sommario/riassunto</b>	This paper studies the spending and absorption of aid in PRGF-supported programs, verifies whether the use aid is programmed to be smoothed over time, and analyzes how considerations about macroeconomic stability influence the programmed use of aid. It finds that PRGF-supported programs allow countries to use most or almost all increases in aid within a few years. The paper finds some evidence that the programmed absorption of aid is higher in countries where reserve coverage is above a certain threshold, whereas programmed spending does not seem to depend on inflation. Finally, it shows that the presence of a PRGF-supported program does not constrain the actual spending and absorption of aid.
