| Sommario/riassunto | This book comprehensively analyzes the development of interculturally blended third spaces by the second language learner, beginning with the linguistic and sociocultural imprints of the first language and culture on the mind and culminating in the proposal of a phase-model of the development of intercultural competence. The foundational |

analysis of L1-mediated constructs is followed by an analysis of forms interaction, concepts of identity and constructs of culture/interculture, thus shifting the object of analysis from the subjective to the intersubjective levels of construction and interaction. The focus of the book is on the gradual development of interculturally blended third spaces in the mind of the learner as genuinely new bases for construction. This book takes an interdisciplinary approach, drawing on research in cultural psychology, linguistic anthropology, critical theory, language acquisition and second language learning and shows how culture and interculture need to be emphasized as an integral part of second language learning.

| Sommario/riassunto | Apocryphal and Literary Influences in Galway Disaporic History establishes that apocryphal stories, in all their transformations, contribute to collective memory. Common characteristics frame their analysis: irreducible and enduring elements, often embedded in archetypal drama; lack of historical verification; establishment in collective memory; revivals after periods of dormancy; subjection to political and economic manipulation; implicit speculation; and literary transformations. This book... |

Sommario/riassunto

This publication seeks to endeavour the relationship between material artefacts and reading practices in ancient and medieval cultures. While the acts of reception of written artefacts in former times are irretrievably lost, some of the involved artefacts are preserved and might comprise hints to the ancient reading practices. In form of case studies, the contributions to this volume examine various forms of written artefacts as to their implications on modes of reading. Analyzing different Qumran scrolls, codices, Tefillin, Mezuzot, magical texts, tablets, bricks, and statues as well as meta-textual and iconographic aspects, the articles inquire the possibilities of how to correlate material aspects to assumed modes of reception and practices of reading. The contributions stem from Egyptology, Papyrology, Qumran Studies, Biblical Studies, Jewish Studies, Ancient Christianity, and Islamic Studies. In total, this volume contributes to the research on practices of reception in times past and demonstrates the potential hidden in text-bearing artefacts.
