Sommario/riassunto

The volume presents a new and unique view of welfare in Russia and Eastern European countries from an intersectional perspective of welfare, gender and agency. Since the collapse of socialism, the welfare structures of the post-socialist states have experienced large and rapid changes. The discussions on the reforming welfare models serve as the integrating theme for the volume. The authors discuss past and current developments and make comparisons in time and space-between the early 1990's a...

Sommario/riassunto	The term chronic traumatic encephalopathy (CTE) has recently gained a significant amount of media coverage. However, a large proportion of the information disseminated through the media pertaining to the etiology, neuropathology, and clinical manifestations of CTE are not corroborated by empirical research, and are disputed by prominent researchers who study sports related head injury. This book reviews the existing literature pertaining to these components of CTE and includes

unique case studies of several retired NFL players that received a comprehensive neuropsychological battery from a board certified neuropsychologist, among other populations. It investigates the claim that CTE causes depression, violent behavior, and an increased risk for suicide by providing an in depth discussion using empirical data. Highlighting the importance of adhering to post concussion protocol and appreciating the long-term consequences of repeated head trauma, this unique review of the current research on CTE will be useful to students and professionals in psychology and neurology. .
