Sommario/riassunto	This exciting new anthology brings together many diverse views on blockbuster and cult science fiction films of the 1970's. These essays, which range in focus from Alien to Zardoz, explore some of the most fundamental questions about the meaning of being human. The chapters of the first section challenge our notions of heroism, confronting our ideas Other issues of history, gender and embodiment. The second section's contributions delve into the human caused monstrosities of our own ingenuity a...

Disciplina	618.2
Soggetti	Pregnancy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This collection provides a forum for leading scholars to examine theoretical insights and empirical findings associated with the recent decline in adolescent pregnancy and childbearing internationally, with special attention given to the United States. This recent shift in the incidence of adolescent fertility is notable in its consistency and magnitude; at the same time, however, continuing historic disparities require focused attention on the contemporary meaning of early childbearing in the U.S. as well as across the globe. The widely interdisciplinary contributions focus on demographic trends in adolescent fertility; successful intervention approaches and major "lessons learned" regarding primary pregnancy prevention; identification of key theoretical issues associated with these trends, with particular focus on the existence and meaning of disparities and their implications for youth development and wellbeing.</p>
