

1. Record Nr.	UNINA9910788456803321
Autore	Takats Sean <1974->
Titolo	The expert cook in enlightenment France // Sean Takats
Pubbl/distr/stampa	Baltimore : , : Johns Hopkins University Press, , 2011
ISBN	1-4214-0338-2
Descrizione fisica	1 online resource (216 p.)
Collana	Johns Hopkins University studies in historical and political science ; ; 129th ser., 2
Disciplina	641.5944
Soggetti	Cooking - France - History - 18th century Cooking, French - History - 18th century Cooks - France - History - 18th century France Social life and customs 18th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (pages [179]-196) and index.
Nota di contenuto	Defining the cook -- Corrupting spaces -- Pots and pens -- Theorizing the kitchen -- The servant of medicine -- Conclusion.

2. Record Nr.	UNINA9910795818103321
Autore	Weedy Brian B (Birron Mathew)
Titolo	Electric power systems [[electronic resource] /] / Brian B. Weedy, ... [et al.]
Pubbl/distr/stampa	Chichester, West Sussex, UK, : John Wiley & Sons, Ltd., 2012
ISBN	1-283-64506-8 1-118-36110-5 1-118-36109-1 1-118-36108-3
Edizione	[5th ed.]
Descrizione fisica	xvi, 496 p. : ill
Altri autori (Persone)	WeedyBrian B
Disciplina	621.319/1
Soggetti	Electric power systems Electric power transmission
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The definitive textbook for Power Systems students, providing a grounding in essential power system theory while also focusing on practical power engineering applications. Electric Power Systems has been an essential book in power systems engineering for over thirty years. Bringing the content firmly up-to-date whilst still retaining the flavour of Weedy's extremely popular original, this Fifth Edition has been revised by experts Nick Jenkins, Janaka Ekanayake and Goran Strbac. This wide-ranging text still covers all of the fundamental power systems subjects but is now expanded to cover increasingly important topics like climate change and renewable power generation. Updated material includes an analysis of today's markets and an examination of the current economic state of power generation. The physical limits of power systems equipment - currently being tested by the huge demand for power - is explored, and greater attention is paid to power electronics, voltage source and power system components, amongst a host of other updates and revisions. Supplies an updated chapter on power system economics and management issues and extended coverage of power system components. Also expanded information on

power electronics and voltage source, including VSC HVDC and FACTS. Updated to take into account the challenges posed by different world markets, and pays greater attention to up-to-date renewable power generation methods such as wind power. Includes modernized presentation and greater use of examples to appeal to today's students, also retains the end of chapter questions to assist with the learning process. Also shows students how to apply calculation techniques.
