Nota di contenuto	Front Cover; Contents; Preface; Acknowledgments; Chapter 1 - Basic Concepts; Chapter 2 - Stability Analysis of Autonomous Systems; Chapter 3 - Stability Analysis of Nonautonomous Systems; Chapter 4 - Stability Analysis of Time-Delayed Systems; Chapter 5 - An Introduction to Stability Analysis of Linguistic Fuzzy Dynamic Systems; References; Appendix A1: Application of VLF in Nonlinear Power System Stabilization; Appendix A2: Proof of Theorem 3.8; Appendix A3: Stability Analysis of Nonlinear Systems via -Homogeneous Approximation Appendix A4: Stabilization of Model Predictive Control of Nonlinear Time-Delayed Systems Appendix A5: Some New Notions for Symmetric Behavior of Matrices and Related Theorems; Back Cover
Sommario/riassunto	The equations used to describe dynamic properties of physical systems are often nonlinear, and it is rarely possible to find their solutions. Although numerical solutions are impractical and graphical techniques are not useful for many types of systems, there are different theorems and methods that are useful regarding qualitative properties of nonlinear systems and their solutions-system stability being the most crucial property. Without stability, a system will not have value. Nonlinear Systems Stability Analysis: Lyapunov-Based Approach introduces advanced tools for stability analysis of no

Sommario/riassunto	Review excerpts from the book on Scribd International arbitration readily lends itself to a legal theory analysis. The fundamentally philosophical notions of autonomy and freedom are at the heart of its field of study. Similarly essential are the questions of legitimacy raised by the parties' freedom to favor a private form of dispute resolution over national courts, to choose their judges, to tailor the procedure and to choose the applicable rules of law, and by the arbitrators' freedom to determine their own jurisdiction, to shape the conduct of the proceedings and to choose the rules applicable to the dispute. The present work, based on a Course given at The Hague Academy of International Law in the Summer 2007, identifies the philosophical postulates that underlie this field of study and shows their profound coherence and the practical consequences that follow from these

postulates in the resolution of international disputes.
