

1. Record Nr.	UNINA9910788533803321
Autore	Buxbaum Joseph D
Titolo	The neuroscience of autism spectrum disorders [[electronic resource] /] / Joseph D. Buxbaum, Patrick R. Hof
Pubbl/distr/stampa	Oxford, : Academic Press, 2013
ISBN	1-283-63107-5 9786613943521 0-12-391930-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (493 p.)
Classificazione	44.91 77.50
Altri autori (Persone)	HofPatrick R
Disciplina	616.8588
Soggetti	Autism spectrum disorders Neurosciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Autism spectrum disorders -- section 2. Etology of autism spectrum disorders -- section 3. Brain imaging and neuropathology of autism spectrum disorders -- section 4. Model systems and pathways in autism spectrum disorders.
Sommario/riassunto	Autism is no longer considered a rare disease, and the Center for Disease Control now estimates that upwards of 730,000 children in the US struggle with this isolating brain disorder. New research is leading to greater understanding of and ability to treat the disorder at an earlier age. It is hoped that further genetic and imaging studies will lead to biologically based diagnostic techniques that could help speed detection and allow early, more effective intervention. Edited by two leaders in the field, this volume offers a current survey and synthesis of the most important findin
