   ISBN   3-11-037088-3

   Descrizione fisica   1 online resource (240 p.)

   Classificazione   SK 240

   Disciplina   516.3/503

   Soggetti   Geometry, Algebraic

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto   Front matter -- Preface -- Notation -- Bibliography -- List Of Terms

   Sommario/riassunto   Algebraic geometry is one of the most classic subjects of university
                          research in mathematics. It has a very complicated language that
                          makes life very difficult for beginners. This book is a little dictionary of
                          algebraic geometry: for every of the most common words in algebraic
                          geometry, it contains its definition, several references and the
                          statements of the main theorems about that term (without their
                          proofs). Also some terms of other subjects, close to algebraic
                          geometry, have been included. It was born to help beginners that know
                          some basic facts of algebraic geometry, but not every basic fact, to
                          follow seminars and to read papers, by providing them with basic
                          definitions and statements. The form of a dictionary makes it very easy
                          and quick to consult.
