Sommario/riassunto	As the East and Southeast Asian regions modernize and urbanize, the

demand for energy is rapidly increasing. Apart from seeking to import fossil fuels from the Middle East, Africa, the Caspian Region, Russia, Latin America, Australia, etc., it is imperative for these Asian countries to cooperate in substantially raising the efficiency with which energy is consumed. This book offers a comprehensive examination of East and Southeast Asia's energy conservation policies. It begins with a summary of current and projected energy supply and demand patterns, and discussions of the need and basis for c
