### Sommario/riassunto

This volume is a collection of grammar sketches from several Italo-Romance varieties. The contributions cover various areas of linguistics (phonology, morphology, syntax) and are organized in sections according to the customary geolinguistic classification. Each chapter provides the description of a salient phenomenon for a given language, based on novel data, as well as the state-of-the-art knowledge on that phenomenon. The articles are in-depth studies carried out by prominent experts as well as promising young scholars. The theoretical apparatus is kept to a minimum in order to make the book accessible to scholars without specific expertise. For the same reason, hypotheses and formalisms are introduced gradually, only if necessary for the description of the data.

Sommario/riassunto	Drawing on philosophical reflection, spiritual and religious values, and somatic practice, Spirit and the Obligation of Social Flesh offers guidance for moving amidst the affective dynamics that animate the streets of the global cities now amassing around our planet. Here

theology turns decidedly secular. In urban medieval Europe, seculars were uncloistered persons who carried their spiritual passion and sense of an obligated life into daily circumambulations of the city. Seculars lived in the city, on behalf of the city, but—contrary to the new profit economy of the time—with a different locus of value: spirit. Betcher argues that for seculars today the possibility of a devoted life, the practice of felicity in history, still remains. Spirit now names a necessary “prosthesis,” a locus for regenerating the elemental commons of our interdependent flesh and thus for cultivating spacious and fearless empathy, forbearance, and generosity. Her theological poetics, though based in Christianity, are frequently in conversation with other religions resident in our postcolonial cities.
