

1. Record Nr.	UNINA9910788631203321
Titolo	Symplectic topology and measure preserving dynamical systems : AMS-IMS-SIAM Joint Summer Research Conference, July 1-5, 2007, Snowbird, Utah // Albert Fathi, Yong-Geun Oh, Claude Viterbo, editors
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [2010] ©2010
ISBN	0-8218-8191-4 0-8218-4892-5
Descrizione fisica	1 online resource (192 p.)
Collana	Contemporary mathematics, , 0271-4132 ; ; 512
Disciplina	514/.223
Soggetti	Simplexes (Mathematics) Diffeomorphisms
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents -- Preface -- List of Speakers -- A Hofer-like metric on the group of symplectic diffeomorphisms -- C0-rigidity of Poisson brackets -- Six questions, a proposition and two pictures on hofer distance for hamiltonian diffeomorphisms on surfaces -- Order structure on action minimizing orbits -- Loops in the Hamiltonian group: A survey -- The group of Hamiltonian homeomorphisms and continuous hamiltonian flows.

Autore	Aboraya Ahmed Sayed
Titolo	Manual for the Standard for Clinicians' Interview in Psychiatry (SCIP) : A New Assessment Tool for Measurement-Based Care (MBC) and Personalized Medicine in Psychiatry (PMP) / / by Ahmed Sayed Aboraya
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	3-030-94930-3
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (444 pages)
Collana	Advances in Mental Health and Addiction, , 2570-3404
Disciplina	411 616.89
Soggetti	Psychiatry Clinical health psychology Clinical psychology Psychological tests Research—Methodology Health Psychology Clinical Psychology Psychological Assessment Research Skills Entrevista en psiquiatria Psicología clínica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. Introduction and Historical Perspectives on Measurement in Psychiatry -- Chapter 2. Rationale for the Development of the Standard for Clinicians' Interview -- Chapter 3. Measurement-Based Care (MBC): Advances in the 21st Century -- Chapter 4. The SCIP Principles of Rating Symptoms, Signs and Creating Reliable Dimensions -- Chapter 5. The Standard for Clinicians' Interview in Psychiatry (SCIP) Scales: clinician-administered (CA) scales and self-administered (SA) scales -- Chapter 6. The Standard for Clinicians' Interview in Psychiatry (SCIP) as

Consistent and Comprehensive Psychiatry Database -- Chapter 7. Training Curriculum for Psychiatrists, Psychiatry Residents and Mental Health Professionals -- Chapter 8. The Standard for Clinicians' Interview in Psychiatry (SCIP) as Assessment Tool for Personalized Precision Psychiatry -- Chapter 9. Case Demonstrations for Using the SCIP as a Measurement-Based Care Tool in Clinical Practice.

Sommario/riassunto

The SCIP manual will introduce a new assessment tool designed to be compatible with 21st century advances in measurement-based care (MBC) and personalized medicine in psychiatry (PMP). The SCIP includes 18 clinician-administered and 15 self-administered reliable and validated scales covering most adult symptom domains: anxiety, obsessions, compulsions, posttraumatic stress, depression, mania, delusions, hallucinations, disorganized thoughts, aggression, negative symptoms, alcohol use, drug use, attention deficit/hyperactivity, and eating disorders. Mental health professionals (psychiatrists, psychiatry residents, psychologists, therapists, clinical social workers, counselors, nurses, nurse practitioners, physician assistants, professors, students, and mental health researchers) are the primary audience of the manual. These professionals will be able to implement SCIP scales in their practice and use the SCIP psychopathology glossary as part of the emerging science of personalized medicine psychiatry (PMP). Existing books on measures and rating scales, such as the two books above, describe different scales developed by different authors at different periods. Each scale has its own rating guidelines and training requirements, which must be followed by clinicians in order to use the scales. This demands a considerable amount of time for clinicians and can be a barrier to using the scales in practice. Even within the same psychopathology domain, many published measurement scales exist. For instance, the book published by Waters and Stephane includes 120 scales for psychosis. Among the 120 scales for psychosis, which scale (s) should the clinician choose? Our proposed manual will remove these barriers by creating simple and universal principles which allow readers to use the 33 reliable and validated SCIP scales with most adult psychiatric disorders. There will be 15 videotaped interviews available online for readers who buy the book. Readers are expected to watch the interviews in conjunction with reading the manual.
