1. Record Nr.   UNINA9910788649603321

   Titolo   Optimization methods in partial differential equations : proceedings
                       from the 1996 Joint Summer Research Conference, June 16-20, 1996,
                       Mount Holyoke College / / Steven Cox, Irena Lasiecka, editors

   Pubbl/distr/stampa Providence, Rhode Island : , : American Mathematical Society, , [1997]
                       ©1997

   ISBN   0-8218-7800-X
                       0-8218-0604-1

   Descrizione fisica 1 online resource (362 p.)

   Collana   Contemporary mathematics, , 0271-4132 ; ; 209

   Disciplina   515/.353

   Soggetti   Differential equations, Partial - Numerical solutions
                       Mathematical optimization

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto   ""Contents""; ""Preface""; ""Boundary observability and controllability of
                       linear elastodynamic systems""; ""Riblets and drag minimization"";
                       ""Min-max problems for non-potential operator equations""; ""An
                       infinite dimensional time optimal control problem""; ""Dirichlet problem
                       for nonlinear first order partial differential equations""; ""Hidden
                       boundary smoothness for some classes of differential equations on
                       submanifolds""; ""Convergence to the asymptotic model for linear thin
                       shells""; ""Variational formulation of optimal damping designs""
                       ""Local exact boundary controllability of the Navier-Stokes system""""""On
                       uniqueness and stability in the Cauchy problem""; ""Augmented
                       Lagrangian-SQP techniques and their approximations""; ""Recent
                       progress and open problems in control of multi-link elastic
                       structures""; ""Spatio-temporal control in the coefficients of linear
                       hyperbolic equations""; ""Modified interior distance functions"";
                       ""Optimal energy decay rate in a damped Rayleigh beam"";
                       ""Approximate and exact formability of two-dimensional elastic
                       structures; Complete and incomplete actuator families""
                       ""Displacement derivatives in shape optimization of thin shells""""""
                       Carleman estimates, unique continuation and controllability for
                       anizotropic PDE's""; ""Navier-Stokes equations in thin spherical

domains""; ""The algebraic Riccati equation with unbounded control operator: The abstract hyperbolic case revisited""; ""One-parameter families of solutions to a class of PDE optimal control problems""
