Vulnerability Indicators, 2001-06; 6. Medium-Term Baseline Scenario, 2002-12; Contents; I. Fund Relations; II. Relations with the World Bank Group; III. Statistical Issues</p>
Sommario/riassunto	<p>Budget revenue in FY2006/07 amounted to 42 percent of GDP, with hydrocarbon revenue mirroring rising oil prices. The current account recorded a surplus of about 31 percent of GDP in 2006. Monetary conditions were characterized by ample liquidity and strong credit growth. Qatar's medium-term (2008–12) outlook is favorable. As of June 2007, annualized inflation was estimated to have risen to 13 percent, compared with 12 percent during 2006. Designing a credible transition plan to implement the vision of a single financial market will be challenging.</p>
