Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. New directions in the study of children and marital conflict -- pt. 2. Child effects of exposure to marital conflict -- pt. 3. Contextualizing marital conflict -- pt. 4. Future directions -- Appendices : coding systems and methodology.
Sommario/riassunto	From leading researchers, this book presents important advances in understanding how growing up in a discordant family affects child adjustment, the factors that make certain children more vulnerable than others, and what can be done to help. It is a state-of-the-science follow-up to the authors' seminal earlier work, <i>Children and Marital Conflict: The Impact of Family Dispute and Resolution</i> . The volume presents a new conceptual framework that draws on current knowledge about family processes; parenting; attachment; and children's emotional, physiological, cognitive, and behavior
