1. Record Nr. UNINA9910788779903321

Autore	Seligman George B. <1927->
Titolo	Rational constructions of modules for simple Lie algebras / / George B. Seligman
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [1981] ©1981
ISBN	0-8218-7591-4
Descrizione fisica	1 online resource (203 p.)
Collana	Contemporary mathematics, ; 5 , 0271-4132
Disciplina	512/.55
Soggetti	Lie algebras Modules (Algebra)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Bibliography: pages 184-185.
Nota di contenuto	Table of Contents -- Foreword -- Part I. Generalities on Finite-Dimensional Modules -- Chapter 1. Basic observations on irreducible modules -- Chapter 2. Relations in irreducible L-modules -- Chapter 3. Induced modules. Construction of irreducible modules. -- Chapter 4. A-admissible L0-modules -- Part II. Behavior upon Splitting. Cartan Multiplication -- Chapter 1. Modules and field extension -- Chapter 2. Cartan multiplication -- Part III. Mappings Satisfying Symmetric Identities -- Chapter 1. Solution of the basic recursion -- Chapter 2. The canonical example -- Chapter 3. A characterization of (Sk (A), I?k) -- Chapter 4. Applications -- Part IV. Structure of Symmetric Powers -- Chapter 1. Summary of classical results -- the split case. -- Chapter 2. A special minimal ideal in sk(A) -- Chapter 3. Symmetric powers for central simple involutorial algebras -- the split case. -- Chapter 4. The general case -- Chapter 5. The minimal ideals of sk(A) are central simple -- Part V. Construction of Representations: Type a and Type C (First Kind) -- Chapter 1. The Lie algebras and their fundamental weights -- Chapter 2. Construction of representations: Weights of group A -- Chapter 3. Weights of group B. -- Chapter 4. Weights of group C. -- Chapter 5. Weights of group D. -- Chapter 6. Weights of groups E and F. -- Chapter 7. Summary -- Part VI. Construction of Representations: Type C (Second Kind) -- Chapter 1. The Lie algebras and their fundamental weights -- Chapter 2.

Construction of representations: weights dI»j(j > 1) -- Chapter 3. Construction of representations: weight kI»1 -- Chapter 4. Construction of representations: weight kI»j + (d-k)I»j+l -- Chapter 5. Summary -- Part VII. Modules for Lie Algebras of Quadratic Forms. -- Chapter 1. The Lie algebras -- fundamental weights -- Chapter 2. Representations with highest weight I»i' i < n -- Chapter 3. Representations with highest weight I»n -- Chapter 4. Representations of highest weight 2I»nA· -- Chapter 5. Summary. Generating modules -- Part VIII. Exceptional Types I: F4 with Associative Coefficients -- Chapter 1. Decomposition of the Lie algebras. Fundamental weights -- Chapter 2. Construction of irreducible representations: I»l and I»2 -- Chapter 3. The case D = K: I»3 and I»4 -- Chapter 4. An embedding of sl(3,Q) in F4(Q) -- Chapter 5. Representations of F4(Q): highest weights I»3 , I»4 and combinations -- Chapter 6. Summary -- Part IX. Exceptional Types II: Lie Algebras Coordinatized by Octonions -- Chapter 1. The algebras sl(3,0) fundamental weights -- Chapter 2. The algebras sp(6,0) -- fundamental weights -- Chapter 3. Representations of sl(3,0) -- the weights 2I»1 , 2I» 2 -- Chapter 4. Representations of sl(3,0): the weight I»l + I»2 -- Chapter 5. Representations of sl(3,0): 2I»1 + I»2 and I»l + 2I»2 -- Chapter 6. Representations of sl(3,0): 2I»1 + 2I»2 and summary -- Chapter 7. An embedding of sl(3,0) in 4p(6,0) -- Chapter 8. Fundamental representations for sp(6,0) -- Chapter 9. Fundamental representations for F4(0) -- Part X. Exceptional Types III: Relative Type A1 -- Chapter 1. The Lie algebras sl(2,J) and their fundamental weights. -- Chapter 2. Fundamental representations for sl(2,J): first identities -- Chapter 3. Second identities -- Chapter 4. Fundamental representations for sl (2,]): general identities -- Chapter 5. Representations of sl(2,J): completeness -- Chapter 6. Remarks on sl(2,C), C a cubic extension -- Part XI. Exceptional Types IV: Relative Type G2. -- Chapter 1. The algebras G2(A) and their fundamental weights -- Chapter 2. An embedding of sl(2,A) in G2(A) -- Chapter 3. Construction of fundamental representations -- Appendices: Splitting Information.
