   Descrizione fisica 1 online resource (194 p.)

   Collana   Contemporary mathematics ; ; 502

   Disciplina   512/.44

   Soggetti   Commutative algebra
                       Combinatorial analysis

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto   Contents -- Preface -- On the classification of toric singularities --
                       An overview on the minimal free resolutions of lexsegment ideals --
                       Cohen-Macaulay squarefree lexsegment ideals generated in degree 2
                       -- On simple A-multi-graded minimal resolutions -- Tangent cones
                       of numerical semigroup rings -- The Igusa local zeta functions of GL2
                       (Qp)-orbit of Fermat's binary form -- Arithmetical rank of monomial
                       ideals of deviation two -- A survey of combinatorial aspects in the
                       topology of complex hyperplane arrangements -- A class of locally
                       complete intersection multiple structures on smooth algebraic varieties
                       as support -- Topological Cohen-Macaulay criteria for monomial
                       ideals -- Regularity and the case of few generators for Stanley-Reisner
                       ideals of sub word complexes -- The type of the base ring associated
                       to a transversal polymatroid.
