

1. Record Nr.	UNINA9910788842103321
Autore	Brundan Jonathan <1970->
Titolo	Quantum linear groups and representations of $GL_n(\mathbb{F}_q)$ // Jonathan Brundan, Richard Dipper, Alexander Kleshchev
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , 2001
ISBN	1-4704-0297-1
Descrizione fisica	1 online resource (127 p.)
Collana	Memoirs of the American Mathematical Society, , 0065-9266 ; ; number 706
Disciplina	510 s 512/.2
Soggetti	Linear algebraic groups Representations of groups Group schemes (Mathematics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"January 2001, volume 149, Number 706 (first of 4 numbers)."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	<p>""Contents""; ""Introduction""; ""1 Quantum linear groups and polynomial induction""; ""1.1 Symmetric groups and Hecke algebras""; ""1.2 The g-Schur algebra""; ""1.3 Tensor products and Levi subalgebras""; ""1.4 Polynomial induction""; ""1.5 Schur algebra induction""; ""2 Classical results on $GL[\text{sub}(n)]$""; ""2.1 Conjugacy classes and Levi subgroups""; ""2.2 Harish-Chandra induction and restriction""; ""2.3 Characters and Deligne-Lusztig operators""; ""2.4 Cuspidal representations and blocks""; ""2.5 Howlett-Lehrer theory and the Gelfand-Graev representation""</p> <p>""3 Connecting $GL[\text{sub}(n)]$ with quantum linear groups""""3.1 Schur functors""; ""3.2 The cuspidal algebra""; ""3.3 'Symmetric' and 'exterior' powers""; ""3.4 Endomorphism algebras""; ""3.5 Standard modules""; ""4 Further connections and applications""; ""4.1 Base change""; ""4.2 Connecting Harish-Chandra induction with tensor products""; ""4.3 p-Singular classes""; ""4.4 Blocks and decomposition numbers""; ""4.5 The Ringel dual of the cuspidal algebra""; ""5 The affine general linear group""; ""5.1 Levels and the branching rule from $AGL[\text{sub}(n)]$ to $GL[\text{sub}(n)]$""</p> <p>""5.2 Affine induction operators""""5.3 The affine cuspidal algebra""; ""5.4 The branching rule from $GL[\text{sub}(n)]$ to $AGL[\text{sub}(n)]$""; ""5.5 A</p>
