

1. Record Nr.	UNINA9910788843503321
Autore	Palmieri John H (John Harold), <1964->
Titolo	Stable homotopy over the Steenrod algebra / / John H. Palmieri
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , 2001
ISBN	1-4704-0309-9
Descrizione fisica	1 online resource (193 p.)
Collana	Memoirs of the American Mathematical Society, , 0065-9266 ; ; number 716
Disciplina	510 s 514/.24
Soggetti	Homotopy theory Steenrod algebra
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Volume 151, number 716 (second of 5 numbers)."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	""Contents""; ""List of Figures""; ""Preface""; ""Chapter 0. Preliminaries""; ""0.1. Grading and other conventions""; ""0.2. Hopf algebras""; ""0.3. Modules and comodules""; ""0.4. Homological algebra""; ""0.5. Two small examples""; ""Chapter 1. Stable homotopy over a Hopf algebra""; ""1.1. The category $\text{Stable}(I?)$""; ""1.2. The functor H""; ""1.2.1. Remarks on Hopf algebra extensions""; ""1.3. Some classical homotopy theory""; ""1.4. The Adams spectral sequence""; ""1.5. Bousfield classes and Brown-Comenetz duality""; ""1.6. Further discussion"" ""Chapter 2. Basic properties of the Steenrod algebra"" ""2.1. Quotient Hopf algebras of A""; ""2.1.1. Quasi-elementary quotients of A""; ""2.2. $P[\sup(s)][\sub(t)]$-homology""; ""2.2.1. Miscellaneous results about $P[\sup(s)][\sub(t)]$-homology""; ""2.3. Vanishing lines for homotopy groups""; ""2.3.1. Proof of Theorems 2.3.1 and 2.3.2 when $p = 2$""; ""2.3.2. Changes necessary when p is odd""; ""2.4. Self-maps via vanishing lines""; ""2.5. Construction of spectra of specified type""; ""2.6. Further discussion""; ""Chapter 3. Chromatic structure""; ""3.1. Margolis' killing construction"" ""3.2. A Tate version of the functor H"" ""3.3. Chromatic convergence""; ""3.4. Further discussion: work of Mahowald and Shick""; ""3.5. Further discussion""; ""Chapter 4. Computing Ext with elements inverted""; ""4.1. The $q[\sub(n)]$-based Adams spectral sequence""; ""4.2. The $Q[\sub(n)]$-based Adams spectral sequence""; ""4.3. $A(n)$ as an A-comodule"";

""4.4. $1/2A(n)$ satisfies the vanishing plane condition""; ""4.5. $1/2A(n)$ generates the expected thick subcategory""; ""4.5.1. The proof of Proposition 4.5.7""; ""4.6. Some computations and applications""
 ""4.6.1. Computation of $(Q[\text{sub}(n)])(\text{sub}^{**})(Q[\text{sub}(n)])$ """"4.6.2. Eisen's calculation""; ""4.6.3. The $I?[\text{sub}(1)]$ -inverted Ext of the mod 2 Moore spectrum""; ""Chapter 5. Quillen stratification and nilpotence""; ""5.1. Statements of theorems""; ""5.1.1. Quillen stratification""; ""5.1.2. Nilpotence""; ""5.2. Nilpotence and F-isomorphism via the Hopf algebra D ""; ""5.2.1. Nilpotence: Proof of Theorem 5.1.5""; ""5.2.2. F-isomorphism: Proof of Theorem 5.1.2""; ""5.3. Nilpotence and F-isomorphism via quasi-elementary quotients""; ""5.3.1. Nilpotence: Proof of Theorem 5.1.6""
 ""5.3.2. F-isomorphism: Proof of Theorem 5.1.3""""5.4. Further discussion: nilpotence at odd primes""; ""5.5. Further discussion: miscellany""; ""Chapter 6. Periodicity and other applications of the nilpotence theorems""; ""6.1. The periodicity theorem""; ""6.2. y -maps and their properties""; ""6.3. Properties of ideals""; ""6.4. The proof of the periodicity theorem""; ""6.5. Computation of some invariants in $HD[\text{sub}^{**}]$ ""; ""6.6. Computation of a few Bousfield classes""; ""6.7. Ideals and thick subcategories""; ""6.7.1. The thick subcategory conjecture""; ""6.7.2. Rank varieties""
 ""6.8. Further discussion: slope supports""
