| Nota di contenuto       | Front Cover; About the book series; Editorial board; Table of contents; List of contributors; Foreword by Bill Stout; Editors' Foreword; About the editors; Acknowledgements; Section 1: Introduction; 1. Towards a sustainable energy technologies based agriculture; Section 2: Energy efficiency and management; 2. Global energy resources, supply and demand, energy security and on-farm energy efficiency; 3. Energy in crop production systems; 4. The fossil energy use and CO2 emissions budget for Canadian agriculture; 5. Energy efficiency technologies for sustainable agriculture and food processing<br>6. Energy-smart food - technologies, practices and policies 7. Energy, water and food: exploring links in irrigated cropping systems; 8. Energy use and sustainability of intensive livestock production; 9. Diesel engine as prime power for agriculture: emissions reduction for sustainable mechanization; Section 3: Biofuels; 10. Biofuels from microalgae; 11. Biodiesel emissions and performance; 12. Biogas; 13. Thermal gasification of waste biomass from agriculture production for energy purposes; 14. An innovative perspective: Transition towards a bio-based economy; Section 4: Access to energy 5. Increasing energy access in rural areas of developing countries Book series page |
| Sommario/riassunto      | Sustainability in agriculture and associated primary industries, which are both energy-intensive, is crucial for the development of any country. Increasing scarcity and resulting high fossil fuel prices                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

combined with the need to significantly reduce greenhouse gas emissions, make the improvement of energy efficient farming and increased use of renewable energy essential. This book provides a technological and scientific endeavor to assist society and farming communities in different regions and scales to improve their productivity and sustainability.
