| Nota di contenuto       | Front Cover; Preface; Dedication; Acknowledgements; Table of<br>Contents; How to use the Manual of Veterinary Clinical Chemistry: A<br>Case Study Approach; Abbreviations; Chapter 1: Developing a Plan for<br>Interpretation; Chapter 2: Liver Enzyme Elevations; Chapter 3: Tests of<br>the Gastrointestinal System and Carbohydrate Metabolism; Chapter 4:<br>Serum Proteins; Chapter 5: Tests of Renal Function; Chapter 6:<br>Abnormalities of Calcium, Phosphorus, and Magnesium; Chapter 7:<br>Electrolyte and Acid/Base Evaluation  |
| Sommario/riassunto      | This title provides veterinary students and non-specialist with a case<br>study base workbook which serves as a guide to effective use and<br>interpretation of clinical chemistry laboratory methods in domestic<br>animals. There are over 100 case studies involving real patients and<br>findings in dogs, cats, horses, lamas, alpacas, pot belled pigs and<br>ferrets. Case studies consist of patient history, physical examination<br>findings, and clinicopathologic data such as CBC, urinalysis, cytology or<br>fluid analysis. A summary is given for each patient that includes a<br>description of follow up tests and response |
