

1. Record Nr.	UNINA9910789011403321
Titolo	Budgeting carbon for equity and sustainability // edited by, Pan Jiahua, Zhang Ying
Pubbl/distr/stampa	UK : , : Paths International Ltd., , [2013] ©2013
ISBN	1-84464-134-1
Descrizione fisica	1 online resource (295 p.)
Collana	China international analysis and evaluation reports
Disciplina	179.1
Soggetti	Carbon dioxide mitigation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Proceedings of the CASS Forum (2010 Economics), Climate Justice and the Carbon Budget Approach, Institute for Urban and Environmental Studies of the Chinese Academy of Social Sciences, Konrad Adenauer Foundation, Misereor.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	part I. Frameworks for budgeting carbon -- part II. Sustainability requirement for a carbon budget approach -- part III. Equality requirement for a carbon budget approach -- part IV. Operation mechanisms of carbon budget approach.
Sommario/riassunto	Climate change is a controversial topic worldwide today and the international regime and corresponding actions will inevitably have a lasting and profound influence on the world economy and international politics. As the largest developing country in the world, China plays an important role in international climate negotiations and is under increasing international pressure. The existing Kyoto Protocol model takes the level of emissions in 1990 as a base and determines the emission reduction obligations of each developed country through negotiation. The findings gathered in this book break thr
