Sommario/riassunto	Cooperative Evolution offers a fresh account of evolution consistent with Charles Darwin's own account of a cooperative, inter-connected, buzzing and ever-changing world. Told in accessible language, treating evolutionary change as a cooperative enterprise brings some surprising shifts from the traditional emphasis on the dominance of competition. The book covers many evolutionary changes reconsidered as cooperation. These include the cooperative origins of life, evolution as a spiral rather than a ladder or tree, humans as a part of natural systems rather than the purpose, relationships between natural and social change, and the role of the individual in adaptive radiation onto new ground. The story concludes with a projection of human evolution from the past into the future.

Sommario/riassunto	"Pterygium: Techniques and Technologies for Surgical Success presents the latest advances in ocular surface surgery and new methods to overcome the traditional complications of pterygium surgery. Dr. John Hovanesian and his contributors address the shortcomings of conventional pterygium surgery through a detailed compilation of intraoperative and postoperative patient management. Delivering the latest breakthrough advances in the field, such as fibrin tissue adhesive and amniotic membrane transplantation, this resource presents the newest range of treatment therapies step-by-step. Pterygium: Techniques and Technologies for Surgical Success is an indispensable resource for ophthalmic surgeons, residents, fellows, and assisting staff who must keep up with the latest ocular procedures regarding pterygium surgery"--Provided by publisher.
