                     Thoughts / Lievers, Menno -- Intensional Epistemic Wholes: A Study in
                     the Ontology of Collectivity / Mari, Alda -- Impossible Primitives /
                     Mateu, Jaume -- Is Compositionality an Empirical Matter? / Peregrin,
                     Jaroslav -- The Compositionality of Concepts and Peirce's Pragmatic
                     Logic / Pietarinen, Ahti-Veikko -- Semantic Holism and (Non-)
                     Compositionality in Scientific Theories / Schurz, Gerhard -- Right and
                     Wrong Reasons for Compositionality / Werning, Markus

   Sommario/riassunto   Representational systems such as language, mind and perhaps even the
                     brain exhibit a structure that is often assumed to be compositional.
                     That is, the semantic value of a complex representation is determined

by the semantic value of their parts and the way they are put together. Dating back to the late 19th century, the principle of compositionality has regained wide attention recently. Since the principle has been dealt with very differently across disciplines, the aim of the two volumes is to bring together the diverging approaches. They assemble a collection of original papers that cover
