Sommario/riassunto

This volume is a collection of papers from the 1st International Conference on Historical Lexicography and Lexicology at the University of Leicester in 2002. The purpose of the conference was to bring together scholars and academics from around the world working as scholars and editors on historical dictionaries or as practising lexicographers. The papers are, accordingly, arranged in two sections, reflecting the distinction between those individuals working on the historical development of dictionaries and those considering the lexicological problems and challenges facing the lexicographer in attempting to represent as fully and justly as possible historical forms of the English language.
