

1. Record Nr.	UNINA9910789146103321
Titolo	Advanced materials and technologies : selected topics from the 17th Physical Metallurgy and Materials Science International Conference in Ambassador, ód, Poland, 2004 // edited by B.G. Wendler, P. Kula and J. Jedlinski
Pubbl/distr/stampa	Uetikon-Zuerich, Switzerland ; ; Enfield, New Hampshire : , : Trans Tech Publications, , [2006] 2006
ISBN	3-03813-043-5
Descrizione fisica	1 online resource (175 p.)
Collana	Materials science forum, , 0255-5476 ; ; volume 513
Altri autori (Persone)	WendlerB. G (Bogdan G.) KulaP (Piotr) JedlinskiJ (Jerzy)
Disciplina	669.9
Soggetti	Physical metallurgy Materials science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Surface Heat Treatment Design Methodology of Large-Scale Castings Technological Surface Layer Selection for Small Module Pitches of Gear Wheels Working under Cyclic Contact Loads ; Change of Micromechanical Properties of Polyethylene Induced by a Tribological Process in Polymer/Metal System ; Growth Structures and Phase Formation in Industrially Room-Temperature Pulsed Laser Deposited FCC Ti-Based Nitride Coatings ; Comparison of Shot Peening and Nitriding Surface Treatments under Complex Fretting Loadings ; Structure and Properties of the Wear Resistant Coatings Obtained in the PVD and CVD Processes on Tool Ceramics Oxidation Resistance of Nanocrystalline Microalloyed -TiAl Coatings under Isothermal Conditions and Thermal Fatigue ; Application of 18O2 Exposure-Based Approach to Study the Failure Mechanisms of Oxide Scales on Alumina Formers ; Strain Induced Up-Hill Diffusion of Hydrogen in Al; Keywords Index; Authors Index
Sommario/riassunto	The compilation, 'Advanced Materials and Technologies', explores

current research efforts and progress in the design and improvement of the performance of structural and functional materials. In particular, the book deals with the relationship between a material's production route, its chemical and phase compositions and microstructure on the one hand; and their influence upon every aspect of a wide range of its properties on the other hand: as well as the various factors which affect the efficiency of applied advanced technologies. Special attention is paid to nanostructures and to properties
