Sommario/riassunto	The aim of the book is to provide an understanding of the current science underpinning Carbon Capture and Sequestration (CCS) and to provide students and interested researchers with sufficient background on the basics of Chemical Engineering, Material Science, and Geology that they can understand the current state of the art of the research in the field of CCS. In addition, the book provides a comprehensive discussion of the impact of CCS on the energy landscape, society, and climate as these topics govern the success of the science being done in this field. The book is aimed at undergraduate students, graduate students, scientists, and professionals who would like to gain a broad multidisciplinary view of the research that is being carried out to solve one of greatest challenges of our generation.

Sommario/riassunto	Este numero especial de la Revista Panamericana de Salud Publica no solo versa sobre los bancos de sangre como sitios encargados de recolectar y procesar sangre, sino que abarca todo el amplio espectro de la medicina transfusional o hemoterapia. La transfusion sanguinea y los bancos de sangre han sido durante muchos anos una de la areas de cooperacion tecnica de la OPS. El principal enfoque ha sido el tamizaje de la sangre para prevenir la transmision de enfermedades. El presente numero especial tiene el proposito de ilustrar los logros y desafios de los servicios de sangre en paises ameri
