Edizione	[7th ed.]
Descrizione fisica	1 online resource (2336 p.)
Altri autori (Persone)	IrwinRichard S RippeJames M
Disciplina	616.028
Soggetti	Critical care medicine Critical Care - methods Intensive Care Units
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section I. Procedures, techniques, and minimally invasive monitoring -- section II. Minimally invasive monitoring -- section III. Cardiovascular problems and coronary care -- section IV. Pulmonary problems in the intensive care unit -- section V. Renal problems in the intensive care unit -- section VI. Infectious disease problems in the intensive care unit -- section VII. Gastrointestinal disease problems in the intensive care unit -- section VIII. Endocrine problems in the intensive care unit -- section IX. Hematologic and oncologic problems in the intensive care unit -- section X. Pharmacology, overdoses, and poisonings -- section XI. Surgical problems in the intensive care unit -- section XII. Shock and trauma -- section XIII. Neurologic problems in the intensive care unit -- section XIV. Transplantation -- section XV. Metabolism/nutrition -- section XVI. Rheumatologic, immunologic, and dermatologic problems in the intensive care unit -- section XVII. Psychiatric issues in intensive care -- section XVIII. Nursing -- section XIX. Contemporary challenges in the intensive care unit -- section XX. Critical care consequences of weapons (or agents) of mass destruction.

Sommario/riassunto

Irwin and Rippe's Intensive Care Medicine is a comprehensive, single-volume textbook covering both the theoretical and practical aspects of medical and surgical critical care. Thoroughly updated for its Seventh Edition, this classic reference remains an unsurpassed source of definitive, practical guidance on adult patient care in the ICU. It provides encyclopedic, multidisciplinary coverage of both medical and surgical intensive care and includes a "how-to" atlas of procedures and a new section on noninvasive monitoring.
