Laboratory Techniques, Special Stains and Immunohistochemistry""; ""INDEX""
Sommario/riassunto	Eye Pathology: An Atlas and Text is a basic introduction to eye pathology that can be read and mastered during an ophthalmic pathology rotation. In addition, it will serve as a well-illustrated resource for residents who are studying for the OKAP examinations or Board certification in ophthalmology. Completely written and illustrated by Dr. Eagle, this single-author text is primarily designed for ophthalmology residents and the comprehensive ophthalmologist not looking for a comprehensive text on the subject.
