Sommario/riassunto

The landslide election of Evo Morales in December 2005 pointed toward a process of accelerated change in Bolivia, forging a path away from globalization and the neoliberal paradigm in favor of greater national control and state intervention. This in turn shifted the power relations of Bolivia's internal politics-beginning with greater inclusion of the indigenous population-and altered the nation's foreign relations. Unresolved Tensions engages this realignment from a variety of analytical perspectives, using the Morales election as a lens through which to reassess Bolivia's contemporary politics
