

1. Record Nr.	UNINA9910789409503321
Titolo	Polarized sources, targets and polarimetry [[electronic resource] ] : proceedings of the 13th International Workshop, Ferrara, Italy, 7-11 September, 2009 / / edited by G. Ciullo, M. Contalbrigo, P. Lenisa
Pubbl/distr/stampa	Hackensack, N.J., : World Scientific, c2011
ISBN	1-283-14858-7 9786613148582 981-4324-92-2
Descrizione fisica	1 online resource (350 p.)
Altri autori (Persone)	CiulloG (Giuseppe) ContalbrigoM (Marco) LenisaP (Paolo)
Disciplina	539.725
Soggetti	Polarized beams (Nuclear physics) Polarized targets (Nuclear physics) Nuclear spin
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"The XIII International Workshop on Polarized Sources - PST 2009, Targets & Polarimetry, was held in Ferrara on September 07th-11th 2009"--Pref.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	CONTENTS; Preface; Organising Committees; Remarks on the history of workshops on "spin tools" E. Ste ens; Polarized proton beams in RHIC A. Zelenski; The COSY/J ulich polarized H- and D- ion source O. Felden; The new source of polarized ions for the JINR accelerator complex V. V. Fimushkin; Resonance effects in nuclear dichroism - an inexpensive source of tensor-polarized deuterons H. Seyfarth; Polarized electrons and positrons at the MESA accelerator K. Aulenbacher; Status report of the Darmstadt polarized electron injector Y. Poltoratska; The Mott polarimeter at MAMI V. Tioukine Proton polarimetry at the relativistic heavy ion collider Y. Makdisi Polarisation and polarimetry at HERA B. Sobloher; Polarisation measurement at the ILC with a Compton polarimeter C. Bartels; Time evolution of ground motion-dependent depolarisation at linear colliders A. Hartin; Electron beam polarimetry at low energies and its

applications R. Barday; Polarized solid targets: recent progress and future prospects C. D. Keith; HD gas distillation and analysis for HD frozen spin targets A. D'Angelo

Electron spin resonance study of hydrogen and alkyl free radicals trapped in solid hydrogen aimed for dynamic nuclear polarization of solid HD T. Kumada; Change of ultrafast nuclear-spin polarization upon photoionization by a short laser pulse T. Nakajima; Radiation damage and recovery in polarized  $^{14}\text{NH}_3$  ammonia targets at Jefferson lab J. D. Maxwell; Polarized solid proton target in low magnetic field and at high temperature T. Uesaka; Pulse structure dependence of the proton spin polarization rate T. Kawahara; Proton NMR in the large COMPASS  $^{14}\text{NH}_3$  target J. Koivuniemi

DNP with TEMPO and trityl radicals in deuterated polystyrene L. Wang; The CLIC electron and positron polarized sources L. Rinolfi; Status of high intensity polarized electron gun at MIT-Bates E. Tsentalovich; Target section for spin filtering studies at COSY and CERN/AD C. Barschel; First experiments with the polarized internal gas target at ANKE/COSY M. Mikirtychyants; Extra physics with an ABS and a Lamb-shift polarimeter R. Engels; Systematic studies for the development of high-intensity ABS L. Barion; Upgrade of the 50 keV GaAs source of polarized electrons at ELSA D. Heiliger

Lifetime measurements of DBR and nonDBR photocathodes at high laser intensities E. Riehn; Polarized electron source based on FZD SRF gun R. Xiang; Major advances in SEOP of  $^3\text{He}$  targets P. Dolph; A study of polarized metastable  $^3\text{He}$  beam production Yu. A. Plis; Polarized  $^3\text{He}$  targets for real and virtual photons J. Krimmer; Spin-filtering studies at COSY and AD F. Rathmann; Experimental setup for spin-filtering studies at COSY and AD A. Nass; Polarizing a stored proton beam by spin-flip? - A reanalysis D. Oellers

Tracking studies of spin coherence in COSY in view of EDM polarization measurements A. U. Luccio

---

### Sommario/riassunto

This book collects the most recent experimental results, new ideas and prototypes in the field of nuclear gaseous and solid polarized targets and polarimetry. It contains the contribution of the biennial meeting on the topics of Polarized Sources, Targets and Polarimetry. Therefore it includes the most recent developments and performances in the field and new proposals. The contributing authors are the experts of the field. The topics covered include: Polarized Electron Sources, Polarized Proton and Deuterium Sources, Polarized Internal Targets, Polarized  $^3\text{He}$  Ion Sources and Targets, Polarimet
