Autore	Fitzpatrick Kathleen
Titolo	Planned Obsolescence : Publishing, Technology, and the Future of the Academy / / Kathleen Fitzpatrick
Pubbl/distr/stampa	New York, NY : , : New York University Press, , [2011] ©2011
ISBN	0-8147-2896-0
Descrizione fisica	1 online resource (254 p.)
Classificazione	AK 39950
Disciplina	070.50973
Soggetti	Communication in learning and scholarship - Technological innovations - United States Scholarly electronic publishing - United States Scholarly publishing - United States Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 213-230) and index.
Nota di contenuto	Front matter -- Contents -- Acknowledgments -- Introduction: Obsolescence -- 1. Peer Review -- 2. Authorship -- 3. Texts -- 4. Preservation -- 5. The University -- Conclusion -- Notes -- Bibliography -- Index -- About the Author
Sommario/riassunto	Choice's Outstanding Academic Title list for 2013Academic institutions are facing a crisis in scholarly publishing at multiple levels: presses are stressed as never before, library budgets are squeezed, faculty are having difficulty publishing their work, and promotion and tenure committees are facing a range of new ways of working without a clear sense of how to understand and evaluate them. Planned Obsolescence is both a provocation to think more broadly about the academy's future and an argument for reconceiving that future in more communally-oriented ways. Facing these issues head-on, Kathleen Fitzpatrick focuses on the technological changes—especially greater utilization of internet publication technologies, including digital archives, social networking tools, and multimedia—necessary to allow academic publishing to thrive into the future. But she goes further, insisting that the key issues that must be addressed are social and institutional in

origin. Springing from original research as well as Fitzpatrick's own hands-on experiments in new modes of scholarly communication through Media Commons, the digital scholarly network she co-founded, Planned Obsolescence explores these aspects of scholarly work, as well as issues surrounding the preservation of digital scholarship and the place of publishing within the structure of the contemporary university. Written in an approachable style designed to bring administrators and scholars into a conversation, Planned Obsolescence explores both symptom and cure to ensure that scholarly communication will remain relevant in the digital future. Check out the author's website [here](#). For more information on Media Commons, click [here](#). Listen to an interview with the author on The Critical Lede podcast [here](#).
