

1.	Record Nr.	UNINA990009784580403321
	Autore	Massi, Ernesto <1909-1997>
	Titolo	Discorso sulla megalopoli / Ernesto Massi
	Pubbl/distr/stampa	Roma : Tip. Centenari, 1976
	Descrizione fisica	8 p. ; 24 cm
	Locazione	ILFGE
	Collocazione	Dono Fondi M-039
	Lingua di pubblicazione	Italiano
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Estr. da: Notiziario di Geografia economica, 1976, n. 1-2
2.	Record Nr.	UNINA9910789433803321
	Autore	Skorzewska Joanna A
	Titolo	Constructing a cult [[electronic resource] ] : the life and veneration of Gumundr Arason (1161-1237) in the Icelandic written sources / / edited by Joanna A. Skorzewska
	Pubbl/distr/stampa	Leiden ; ; Boston, : Brill, 2011
	ISBN	1-283-12073-9 9786613120731 90-04-19497-5
	Descrizione fisica	1 online resource (326 p.)
	Collana	Northern world, , 1569-1462 ; ; v. 51
	Altri autori (Persone)	SkorzewskaJoanna A
	Disciplina	282.092 B
	Soggetti	Christian saints - Iceland Bishops - Iceland Christian saints - Cult - Iceland - History Christian hagiography Iceland Church history Sources Iceland Religious life and customs Sources
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa

Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>The source material -- The childhood of a saint -- Adolescence and first steps towards a clerical career -- In vita miracles : the means, the performance, and the criticism -- Guðmundr's relationship with powerful laymen -- The infallible supporters : women and saints -- "The father of the poor"? -- The death of the saint and his posthumous fame -- Appendix 1: Offerings listed in miracle stories (GJtb, GB, and GD) -- Appendix 2: Miracle stories that mention provision of food -- Appendix 3: Translatio of Guðmundr's bones performed by Bishop Auðunn &amp;#x17e;orbergsson as recorded in the Icelandic annals -- Appendix 4: The cultus of the vernacular saints as recorded in the Icelandic annals -- Appendix 5: Obituaries of "holy men" in the Icelandic annals -- Appendix 6: Days honouring the Icelandic holy bishops as recorded in charters -- Appendix 7: The geographical distribution of images and sagas of the Icelandic holy bishops -- Appendix 8: Episcopal sees and religious houses in Iceland.</p>
Sommario/riassunto	<p>The figure of Guðmundr Arason (1161-1237) and especially his role in the history of medieval Iceland has provoked many strong opinions for decades. This book uses a variety of extant written sources to reexamine those views. It discusses a discrepancy between the popularity of the saint as suggested by the sagas and that reflected by other sources. One of the study's main claims suggests that the clergy from Northern Iceland had a vital impact upon the construction of the cult. A variety of means applied to achieve it demonstrate the authorial knowledge of the vernacular and international traditions, as well as of living conditions in Iceland at the time when the sources were put down in writing.</p>

3. Record Nr.	UNINA9910830902003321
Autore	Kaye Brian H (Brian Howard), <1932->
Titolo	Characterization of powders and aerosols [[electronic resource] /] / Brian H. Kaye
Pubbl/distr/stampa	Weinheim ; ; New York, : Wiley-VCH, c1999
ISBN	1-281-76430-2 9786611764302 3-527-61402-8 3-527-61403-6
Descrizione fisica	1 online resource (326 p.)
Disciplina	620.43 660.294515
Soggetti	Aerosols - Analysis Particle size determination Powders - Analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Characterization of Powders and Aerosols; Table of Contents; 1 Basic Concepts in Characterization Studies, Representative Samples and Calibration Standards; 1.1 Who Needs to Characterize Powders and Spray Systems?; 1.2 The Physical Significance of Size Measurements; 1.3 Standard Powders for Calibrating Powder Measurement Techniques; 1.4 Representative Samples; 1.5 Representative Samples from Suspensions and Aerosol Clouds; 1.6 Dispersing Powder Samples for Size Characterization Studies 2 Direct Measurement of Larger Fineparticles and the Use of Image Analysis Systems to Characterize Fineparticles 2.1 Measurements on Larger Fineparticles; 2.2 Measuring the Shape Distribution of Fineparticles Using the Concept of Chunkiness; 2.3 Characterizing the Presence of Edges On a Fineparticle Profile; 2.4 Geometric Signature Waveforms for Describing the Shape of Fineparticles; 2.5 Using Automated Image Analysis Systems to Size Fineparticle Populations; 2.6 Fractal Characterization of Rugged Boundaries; 2.7 Stratified Count Logic for Assessing an Array of Fineparticle Profiles

2.8 Special Imaging Procedures for Studying Fineparticles3  
 Characterizing Powders Using Sieves; 3.1 Sieving Surfaces; 3.2 The Rate of Powder Passage Through a Sieve; 3.3 Sieving Machines; 3.4 Possible Future Developments in Sieving; 4 Size Distribution Characterization Using Sedimentation Methods; 4.1 Basic Considerations; 4.2 Size analysis Procedures Based on Incremental Sampling of an Initially Homogeneous Suspension; 4.3 Sedimentation Characterization Based on Cumulative Monitoring of Sediments from an Initially Homogeneous Suspension  
 4.4 Line Start Methods of Sedimentation Fineparticle Size Characterization4.5 Sedimentation Studies of Fineparticles Moving in a Centrifugal Force Field; 5 Characterizing Powders and Mists Using Elutriation; 5.1 Basic Principles of Elutriation; 6 Stream Methods for Characterizing Fineparticles; 6.1 Basic Concepts; 6.2 Resistazone Stream Counters; 6.3 Stream Counters Based on Accoustic Phenomena; 6.4 Stream Counters Using Optical Inspection Procedures; 6.5 Time-of-Flight Stream Counters; 7 Light Scattering Methods for Characterizing Fineparticles  
 7.1 The Basic Vocabulary and Concepts of Light Scattering7.2 Studies of the Light Scattering Properties of Individual Fineparticles; 7.3 Light Scattering Properties of Clouds and Suspensions of Fineparticles; 7.4 Diffractometers for Characterizing Particle Size Distributions of Fineparticles; 7.5 Measuring the Fractal Structure of Flocculated Suspensions and Aerosol Systems Using Light-Scattering Studies; 8 Doppler Based Methods for Characterizing Fineparticles; 8.1 Basic Concepts Used in Doppler Methods for Characterizing Fineparticles 8.2 Stream Counters Based on Doppler Shifted Laser Light

---

Sommario/riassunto

Characterization of fine particles is a difficult task!A large number of industries deal with materials in powder form. The properties of these powders depend on their particle size, particle shape and size distributions, surface and porosity.What are the methods?What are the problems?What questions need answering?This new book covers the problems of sampling both powders and aerosols, and discusses calibration standards for different instruments. It takes into account fractionating methods for fine particles, e.g., sieving procedures, sedimentation methods, and
