1. Record Nr. UNINA9910789437203321

Autore	Singh Bhawani
Titolo	Engineering rock mass classification [[electronic resource]] : tunnelling, foundations, and landslides / / Bhawani Singh, R.K. Goel
Pubbl/distr/stampa	Burlington, Mass., : Butterworth-Heinemann, 2011
ISBN	1-283-15265-7 9786613152657 0-12-385879-8
Descrizione fisica	1 online resource (382 p.)
Altri autori (Persone)	GoelR. K. <1960->
Disciplina	625.1/22
Soggetti	Engineering geology Tunneling Foundations Landslides - Prevention Rocks Rock mechanics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Rock mass classification methods are commonly used at the preliminary design stages of a construction project when there is very little information. It forms the bases for design and estimation of the required amount and type of rock support and groundwater control measures. Encompassing nearly all aspects of rock mass classifications in detail, Civil Engineering Rock Mass Classification: Tunnelling, Foundations and Landsides provides construction engineers and managers with extensive practical knowledge which is time-tested in the projects in Himalaya and other parts of the world in comple
