Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction: beyond the resource curse -- The political economy of the natural resource paradox -- Extracting resource wealth : the political economy of sector organization -- Taxing resource wealth : the political economy of fiscal regimes -- Investing resource wealth : the political economy of public infrastructure provision -- Conclusion : collaborative engagement to address the resource paradox.
Sommario/riassunto	This volume focuses on the political economy surrounding the detailed decisions that governments make at each step of the value chain for natural resource management. From the perspective of public interest or good governance, many resource-dependent developing countries pursue apparently short-sighted and sub-optimal policies in relation to the extraction and capture of resource rents, and to spending and savings from their resource endowments. This work contextualizes these micro-level choices and outcomes.
