| Sommario/riassunto | Dag Pike draws on his experience as merchant navy captain, fast boat navigator and boat safety tester for RNLI lifeboats to focus on a wide range of disasters at sea. He compiles a wide range of accounts of yachts, motorboats and commercial vessels running into difficulty as a result of poor navigation, fog, miscalculation, human error, weather conditions etc and analyses in a readable and entertaining fashion what caused the disaster, what went wrong, how it was dealt with and the lessons learned from it. Examples range from the Fastnet disaster, powerboat races, boats run down in the Channel |
