Hadwick.

Sommario/riassunto

According to Ernst & Young, the investment community believes that up to 50 percent of a company's value is intangible - based mostly on corporate reputation. This book contains academic content along with practical contributions, developed by those serving as consultants or working in organizations specialising in corporate reputation and its management or recovery. Any book that is going to do justice to a subject that is so complex and intangible needs imagination, depth and range, and this is exactly what the contributors bring with them.
