Sommario/riassunto	Chinese and Greco-Roman ethics present highly articulate views on how one should live; both of these traditions remain influential in modern philosophy. The question arises how these traditions can be compared with one another. Comparative ethics is a relatively young discipline, and this volume is a major contribution to the field. Fundamental questions about the nature of comparing ethics are treated in two introductory chapters, followed by chapters on core issues in each of the traditions : harmony, virtue, friendship, knowledge, the relation of ethics to morality, relativism. The volume closes with a number of comparative studies on emotions, being and

unity, simplicity and complexity, and prediction.
