Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. Small groups -- pt. 2. Large groups -- pt. 3. Median groups.
Sommario/riassunto	'This book is a remarkable tribute to the memory of Pat de Mare. You will find in these pages a selection of his work that represents his new and different understanding of groups, both large and small, that has not only had a significant impact on the practice of group therapy in his lifetime, but also a potential for revolutionizing current thinking both now and in the future. The editors are owed a great debt of gratitude for putting so much important work together. They have organized the book around three sections on the small, median and large groups. What is particularly moving is that each section is introduced by some of Pat's closest friends and colleagues. These introductions are not only invaluable preparation for reading the articles by Pat that follow, but are also a poignant tribute to the writers' lives, work, their thinking and much happiness that came from their close relationship with Pat.

Sommario/riassunto	This report is an output of the technical assistance activity carried out over 2008-2010 to Alternative Energy Promotion Center (AEPC), which is the nodal renewable energy agency of Nepal. This study has been designed to establish a monitoring system for AEPC to continually measure the results of the renewable energy programs against the targets and to organize an evaluation system that measures the impact of micro-hydro installations on rural livelihoods. Given AEPC's highly visible role, the need to develop a system that provides information on a wide range of technical, operational, and fin
