| Nota di contenuto       | COVER; Introduction; CHAPTER ONE: Theory and evidence in the Freudian field: from observation to structure; CHAPTER TWO: Psychoanalysis operates upon the subject of science: Lacan between science and ethics; CHAPTER THREE: A matter of cause: reflections on Lacan's "'Science and truth'"; CHAPTER FOUR: Causality in science and psychoanalysis; CHAPTER FIVE: Elements of epistemology; CHAPTER SIX: Knowledge and science: fantasies of the whole; CHAPTER SEVEN: From mathematics to psychology: Lacan's missed encounters CHAPTER EIGHT: Postures and impostures: on Lacan's style and use of mathematical science CHAPTER NINE: What causes structure to find a place in love?; CHAPTER TEN: A Lacanian approach to clinical diagnosis and addiction; CHAPTER ELEVEN: Lacan between cultural studies and cognitivism |
| Sommario/riassunto      | "The current volume represents an exciting collection of essays critically examining the relation between modern science and Lacanian psychoanalysis in approaching the question of mental suffering. Lacan & Science also tackles more widely the role and logic of scientific practice in general, taking as its focus psychic processes. Central themes that are explored from a variety of perspectives include the use   |

of mathematics in Lacanian psychoanalysis, the importance of linguistics and Freud's text in Lacan's approach, and the central significance attached to ethics and the role of the subject. Constituting an invaluable addition to existing literature, this comprehensive volume offers a fresh insight into Lacan's conception of the subject and its implications to scientific practice and evidence."--Provided by publisher.

| Sommario/riassunto      | This book is about the limits of machine translation. It is widely recognized that machine translation systems do much better on domain-specific controlled-language texts (domain texts for short) than on dynamic general-language texts (general texts for short). The  |

authors explore this general - domain distinction and come to some uncommon conclusions about the nature of language. Domain language is claimed to be made possible by general language, while general language is claimed to be made possible by the ethical dimensions of relationships. Domain language is unharmed by the constraints of
