

1. Record Nr.	UNINA9910789688303321
Titolo	Concrete for underground structures [[electronic resource] ] : guidelines for design and construction / / edited by Robert J.F. Goodfellow
Pubbl/distr/stampa	Englewood, Colo., : Society for Mining, Metallurgy, and Exploration, c2011
ISBN	1-61344-146-0 0-87335-347-1
Descrizione fisica	1 online resource (178 p.)
Altri autori (Persone)	GoodfellowRobert J. F
Disciplina	620.1/36
Soggetti	Underground construction Concrete construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title; Copyright; Contents; Preface; Acknowledgments; Chapter 1 Introduction; Chapter 2 Cast-in-Place Concrete; Chapter 3 Precast Concrete Segmental Linings; Chapter 4 Shotcrete; Chapter 5 Admixtures; Appendix A Cast-in-Place Concrete Tunnel Lining Specifications; Appendix B Precast Concrete Segmental Lining Specifications; Appendix C EPDM Gaskets for Precast Concrete Tunnel Lining Specifications; Appendix D Shotcrete Specifications; Index; Back Cover
Sommario/riassunto	Concrete is a vital component of almost every underground construction project. Because it significantly impacts both the durability and cost of a project, owners, designers, and contractors are constantly challenged with designing and placing the concrete to meet their quality standards in the most cost-effective way. Concrete for Underground Structures: Guidelines for Design and Construction can make that task a lot easier. Instead of searching pages of scattered reference materials when writing specifications, this book is a one-source guide to help you quickly find the answers you
