Sommario/riassunto

This is the first book written on clinical research and work related to the development of applied trauma psychology in Hong Kong. Contributed by numerous reputable researchers and clinicians, the book covers the latest research and practice on assessment, psychological sequel (including psychological distress and growth of traumatic experience), evidence-based clinical intervention, and rehabilitation services for people affected by various traumatic stresses. Discussed in detail are interpersonal trauma like child sexual abuse and family violence, health and medical trauma such as infectious
