| Sommario/riassunto | This book is a philosophical work by British philosopher John Stuart Mill. It was a radical work to the Victorian readers of the time, as it supported individuals' moral and economic freedom from the state. This edition has been specially formatted by Andrews UK for today's e-reading devices, and features an easy-to-navigate table of contents. |

Nota di contenuto	Introduction -- Temporal Dimensions of Low-Cost, High-Skill Fisheries in the Central Visayas, Philippines -- The Unsung Heroes in Indigenous Landscape Management -- Case Study from Rancakalong of West Java, Indonesia -- The Intersection of Kedayan Folk Medicine and Traditional Ecological Calendar -- Traditional Medicinal Knowledge of Vendors and Their Contribution Towards Community Healthcare in Baguio City, Philippines -- Case Study with the Urang Kanekes of Banten, Indonesia -- Case Study with the Vaie People of Sarawak, Malaysia.
Sommario/riassunto	This open access book demonstrates the linkages between local languages, traditional knowledge, and biodiversity at the landscape level in Asia, providing a fresh approach to discussions on Asia's

biocultural diversity. The book carries forward earlier analyses but importantly focuses on 'traditional ecological calendars,' 'folk medicine,' and 'folk names' in the context of the vital importance of maintaining biological, cultural, and linguistic diversity. It does this by addressing a range of cases and issues in relation to Southeast Asia: Brunei Darussalam, Indonesia, Malaysia, the Philippines, and North-East India. The several chapters demonstrate the ways in which the various forms of knowledge of the environment and its categorizations are important in areas such as landscape and resource management and conservation. They also demonstrate that environmental knowledge and the practical skills which accompany it are not necessarily widely shared. This book sends important messages to those who care about the sustainability of our environment, the maintenance of its biocultural diversity, or at least the maintenance of what remains of it because much has changed. This interdisciplinary collection draws from a wide range of disciplines and is of appeal to students and scholars in anthropology, environmental studies, geography, biodiversity, and linguistics.
